12	bp pulse	bp pulse	www.bppulsefleet.com	Brian T Ross	brian.ross3@bp.com	847-347-4613	Site Developer Operations & Maintenance	In the US, bp pulse has begun growing our public EV charging network on the west and east coasts. Our focus is on delivering DCFC stations (greater than 100 kW) that are operated on our bp pulse network. We have been able to leverage our existing retail fueling network to create an exceptional customer experience that integrates charging and convenience. We believe we are uniquely suited to deliver on South Carolina's NEVI program goals through the following differentiators:  1.End to end solution provider with scalability: bp pulse can provide a turnkey solution to solve SC's critical requirements, infrastructure deployment, operations, and EV charging solutions across the state designated AFCs.  2.Execution experience: We have the execution and project management experience for site development with over 1000 DCFC installations since 2021 for our "behind the fence" fleet customers and our rapidly growing public charging program.  3.Proven technology: bp's current rewards application, BPme, has over 2 million registered users in the US which we intend to use to retain customer loyalty as drivers transform from fuel to electric vehicles. Our OMEGA platform for fleets optimizes power flow and prioritizes charging performance at lower cost.  4.Operational precision and vendor management: bp has decades of operational experience, vendor management through its global network of retail sites.  5.Focus on safety and inclusion: Safety and equity is part of our core values and a fundamental tenet to how we operate. 35	Vee Ventures, LLC	Mount Pleasant, SC	www.letsvee.com	Shari Novick	shari@letsvee.com	646-387-9765	South Carolina Based Business Consulting & Advisory	1) Capital/Fundraising: connecting leaders in government and industry, as well as developers, to the investors, capital and partnerships they need for large-scale project and infrastructure development. We then partner with these leaders to define the growth strategies, brands, and attract the talent they need to support workforce development**. 2) Brand strategy development: along with design, development, and activation, including narrative, storytelling, messaging frameworks and content for communication of the long-term potential of the industry to key stakeholders across the SC EV ecosystem and engagement through direct and through public-facing campaigns - on/offline; traditional. OOH, digital and social media. 2a) Branding campaign(s) to frame the opportunities and communicate benefits for citizens, while addressing barriers to EV adoption (inc: costs, charging speed and distance, et al) to drive engagement and accelerate adoption. 2b) Branding and engagement campaigns to increase awareness of and drive interest in EV occupations, compelling career pathways, tools, and upskilling programs to attract and train the talent needed. As a business leader and SC Chamber member fairly new to SC, I am aware of the talent gap in SC to support the pace and scale of business attraction and investment in general through meetings with the DOC and DEW, as well as the EV workforce required to support NEVI development in particular and via NEVI working group meetings. 3) Partnership(s)* with and adoption of successful models and adaptation of blueprints and roadmaps developed by outside experts doing this, if not for the same sector, for comparable (mainly technical) industries that could be adapted for our needs in SC to scale capacity and develop capabilities quickly. *I know of such partners and could develop/bring in such partnerships. **Our company has also developed and deployed a recruitment tech platform in combination with a scientifically (industrial/organization psychology) backed methodology and process to attract and evaluate talent at scale. Our largest recent application of it has been for a F50 corporate client in the Automotive/Future Mobility space, including for electric and autonomous vehicles.	EVSE Provider Site Host Site Developer Contractor

65	AK Power Solutions	Roanoke, VA	www.akpowers.com	Gabe de Paz	gabriel.depaz@akpowers.com	540-988-2461	EVSE Provider Electrical power distribution equipment (Transformer and Switchgear)	AK Power Solutions, an engineering and manufacturing firm that shares ownership with Virginia Transformer Corp—the largest US-owned transformer manufacturer in North America—specializes in custom Integrated Power Modules (IPMs). Our IPMs package the transformers, switchgear, and (optional) metering needed for EV infrastructure into a compact skid module that can be installed in just one day.  Calibrated specifically for DCFC, our dry transformers feature K-factors optimized for the load curves of DCFC, providing safer, more efficient, and long-lasting performance.  Built in our Virginia manufacturing facility, we are able to meet BABA requirements. Our current lead times are 24–28 weeks, a fraction of the >2 years typical for traditional power infrastructure. With a single line diagram provided, our engineering team can turn around customized quotes in 1-2 weeks. Please reach out to gabriel.depaz@akpowers.com with any questions! 66	Watershed Consulting Group	Columbia/Statewide	www.watershedconsults.com	Mike McCauley	mike@watershedconsults.com	843-343-4109	Consultants with direct experience supporting all company / organization types listed here	<p>Watershed is a Columbia-based regional consulting firm that partners with corporate, public, and non-profit clients and coalitions to leverage and maximize the impact of federal investments and incentives in the Palmetto State and beyond. Watershed consultants hail from the Fortune 500, leading associations and nonprofits, and all levels of government, bringing cross-sector experience and expertise in:</p> <ul style="list-style-type: none"> <li>- Government programs &amp; incentives</li> <li>- Grant strategies &amp; project finance</li> <li>- Strategic planning &amp; market analysis</li> <li>- Project development &amp; management</li> <li>- Capacity building &amp; partnerships</li> <li>- Research &amp; evaluation</li> <li>- Community engagement &amp; coalition building</li> <li>- Communications &amp; marketing</li> </ul> <p>Watershed clients and partners range from multinational corporations and global philanthropies, to local governments and community-based startups. We advise businesses on market trends, government programs and incentives, and strategic partnerships. We work with state agencies, institutions of higher education, statewide associations, and foundations to inform program design, develop and execute capacity-building and stakeholder education initiatives, boost program uptake, and evaluate outcomes and efficacy. Watershed has been privileged to help clients and partners secure over \$200 million in competitive funding since 2022. Our consultants bring a robust understanding of federal investments and incentives, particularly those made available under the \$1.2 trillion Infrastructure Investment &amp; Jobs Act; \$280 billion CHIPS and Science Act; and \$369 billion in energy, climate, and workforce measures within the Inflation Reduction Act.</p> <p>In addition, our consultants have longstanding, trusted relationships with South Carolina leaders, ranging from manufacturers and developers, to state and local government agencies and community foundations, and we work collaboratively to connect these entities with partners and support the pursuit of funding for and implementation of impactful projects and programs. Watershed offers project-based and advisory services that combine innovation, quality, and cultural competence through a market-leading team of consultants with deep networks and a shared dedication to the health, sustainability, and economic prosperity of South Carolina communities and neighbors across the Southeast.</p>	EVSE Provider OEM Manufacturer Site Host Site Developer Operations & Maintenance Contractor Small Business South Carolina Based Business Disadvantaged Business Enterprise (DBE)
